

Test Data Reuse Letter

This application is intended to reuse previous test data (from FCC ID: ZMOMC610LA, certified on 08/03/2021 of initial application), since the two models of products are hardware-wise identical and only the following changes have been made:

MC610-LA (FCC ID: ZMOMC610LA), MC610-LA (FCC ID: ZMOMC610LA06), use identical internal printed circuit board layouts, have a common design and components. the difference only in the depopulation of components for the purposes of removing frequency bands of operation.

So, we have performed spot checks on the following items to verify that if any unexpected RF conducted power or emission changes can be noted. The test results show that all spot check data are within the instrument measurement uncertainty and data reuse is justifiable.

Verification test items with 1 sample:

- Conducted Power
- Radiated Emission Test for the test result

please refers to included exhibit "Test Reports.pdf" for detail

Reuse data test items

- Conducted Power / EIRP/ ERP / PAPR / OBW / Modulation characteristics / Frequency stability
- Radiated Emission / Conducted Emission / Band edge

Also, both the referenced application and this new application are all subject to the same FCC rule and there is no new rule update for related rules. Accordingly, we believe that the reuse data from previous certified filing is justifiable. Thank you for your attention and please feel free to contact us, if you should have any questions. Sincerely yours,

Lucy Liu
