Dear Sir or Madam:

The chip installed in our product LTE Module (model name: SQ808-NA), FCC ID:ZMOSQ808NA, which support TDD-LTE/FDD-LTE/WCDMA/GSM, also integrated BT/WIFI functions. But for the product, it only activates GPRS/EDGE850/1900, WCDMA Band2/4/5, LTE Band2/4/5/7/12/13/17/25/26/41/66, BT(BDR&EDR), BLE1M, 2.4G WiFi: 2412-2462MHz(802.11b/g/n ht20), and 5G WiFi: 5150-5250 MHz, 5250-5350MHz, 5470-5725MHz, 5725-5850MHz (802.11a/n ht20/ac vht20/ n ht40/ ac vht40/ac vht80), the other functions are disabled by software. The end user can't have the ability to active it.

Please contact me if there is need for any additional clarification or information.

Best Regards,
Sincerely Yours,

Client's signature
