The image shows the back of a black smartphone with its battery cover removed. The battery is a large, rectangular, black unit with a grid of small white dots. A white label with the word "VOID" repeated diagonally is stuck to the top of the battery. To the right of the battery is the camera module, which includes a lens and a flash. Below the camera is a small, rectangular, gold-colored component, likely a SIM card or a small battery. The phone's frame is black, and the internal components are visible. The phone is lying on a red surface.
