Summary of testing:

The equipment under test in accordance with the conditions of acceptability complies with the requirements.

Conditions of Acceptability:

- In order to verify, if a component is already tested according to the applicable standard (IEC) following information-sources are accepted, in agreement with the customer: Copies of the type approval test certificate, markings on a component, brochures and prospectus from the manufacturer of the component, declarations of conformity from the manufacturer of the component, and information from the customer; all information the test-laboratory receives will not be verified.
- This test does not cover tests concerning an IP class according to IEC 60529.
- All safety instructions and equipment marking has to be in the language which is acceptable in the country in which the equipment is to be installed. Documentation, intended for service persons only, is permitted to be in English language only, except Germany where also this information has to be in the German language, too. The safety instructions are not evaluated in this report.
- A marking close to the battery or a statement in the servicing instructions with following or similar text:
