RE: Part 15 Subpart E U-NII 6GHz Attestation Letter

To whom it may concern: We, AMPAK Technology Inc., attest that this device under FCC ID: ZQ6-AP581ISA complies with the device protocol requirements and operational restrictions noted in Part 15E of the FCC's rules for 6GHz bands for Indoor Access Client 6XD.

Indoor Client 6XD:

a. Contention-Based Protocol, as demonstrated in the test report, is permanently embedded in the module and is not host-dependent.

b. the device will only associate and connect with a low-power indoor access point or subordinate device and never directly connect to other client devices.

c. this device will always initiate transmission under the control of a low-power indoor AP or subordinate except for brief transmissions before joining a network. These short messages will only occur if the client has detected an indoor AP or subordinate operating on a channel. These brief messages will have a time-out mechanism such that if it does not receive a response from an AP it will not continually repeat the request.

d. transmissions will be lower or equal to the power advertised by the indoor low-power access point or subordinate and never above the maximum output power allowed by the FCC grant for equipment class 6XD.

e. Contention-based protocol as demonstrated in the test report is permanently embedded in the module and is not host-dependent.

2. Understanding of Statement acknowledging device restrictions:

2. Understanding of Statement acknowledging device restrictions:

a. Prohibited for control of or communications with unmanned aircraft systems, including drones.
