### 1. Start up your device

#### 1.1 Connect the power

Firstly, connect one end of USB cable to the adapter, and plug the other end into the micro USB device, then connect mouse and keyboard that used to manage the Android TV dongle, and connect the dongle to the HDMI connector of your TV or Monitor. Finally, connect the power adapter into the wall socket.

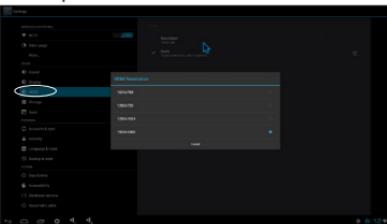

#### 1.2 The TV dongle start

When it start, the TV screen shows the main interface, if it can not boot, please refer to "Frequently Asked Questions".

### 2. USE

#### 2.1 Adjust the display resolution

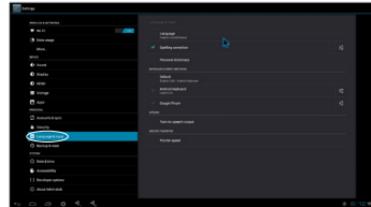

If the image on the TV screen size does not fit properly or does not look rightly, click the "Settings" and choose the "HDMI", then set the output resolution.

1

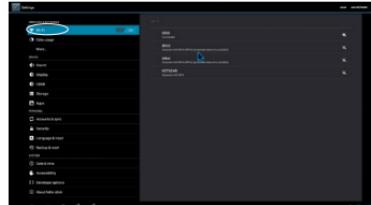

### 2.2 Set language

Click the "Settings", then choose the "Language & input", and choose your language that you need.

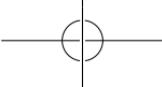

### 2.3 Connect to the network

The TV dongle has built-in WiFi, when firstly use you need to set up the WiFi network. Firstly click "settings", then turn on the "Wi-Fi" and choose the WiFi router finally, input the password( if has password), click "Connect" and when connected, the bottom right corner of the screen will display the "WiFi" icon.

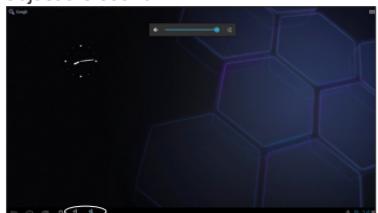

3

## 2.4 Adjust the volume of sound

Use the mouse click the volume +/- icons to adjust the sound.

## 2.5 Copy files from computer

Firstly, connect the TV dongle with your computer by the USB cable supplied, and a few seconds later, you will see a new disk in the computer. Then you can copy files to the TV dongle

## 2.6 Install and uninstall applications

### 2.6.1 Install applications

Click the icon( shop) in the top right corner or "Play Store", then choose the APK that you need, and download it, then you install it.

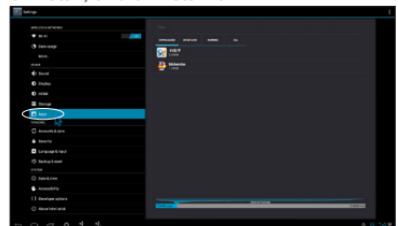

If you use the "Play Store" for the first time, you need to input your Google mail account and password following the tips as your Google account

4

## 2.6.2 Uninstall applications

Click the "settings", then choose the "Apps", and click the application which you want to uninstall, and uninstall it.

## 3. Frequently Asked Questions

1. If the TV is turned on but TV screen doesn't show TV android interface, please check

5

whether the HDMI is connected well, or check whether the TV video output has been switched to HDMI output.

2. If you can not see mouse icon on TV screen, please check whether the mouse is connected well, if you use 2.4G wireless mouse, please make sure it has battery inside.( Some of the mouse do not match the TV dongle due to non-standard, please consult the mouse suppliers).

3. If you have set up the WiFi network, but still no internet access, please check if the WiFi icon in lower right corner is completely gray. If it is gray it means the WiFi signal is weak, approach the router or access point to verify wireless connection.

4. When you need to input text but soft keyboard doesn't appear, please click the "keyboard" icon in the lower right corner, and turn off the "physical keyboard".

5. Some applications are designed for mobile phones and may not be full screen displayed.

6. If some applications can not be used, these applications may not be optimized for the Android 4.0 operation system.

## FCC Notice

### FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct

The interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

This device complies with Part 15 of FCC Rules.

Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

Note: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate this equipment.
