◆Important safety precautions

In order to give full play to over-all properties of the new child tablet PC, and avoid improper operation, please read the operation manual carefully before using it:

1. Do not place the tablet computer in hot, cold, dusty, humid environment.
2. When using this product, do not let the tablet computer fall or make a hard object impact TFT screen, it will scratch the screen and affect TFT normal operation. Please note that the user is responsible for the damage caused by human and other force majeure.
3. Avoid using tablet computer in dry conditions, in order to prevent static electricity.
4. Please charge under the following cases:
 - A) The battery icon shows no power.
 - B) The tablet computer shutdown automatically or reboot but shutdown again.
 - C) Operating without responses.
5. Do not place heavy objects on the tablet computer, or it will damage the tablet computer.
6. Used as mobile hard disk, please follow the correct file

management operation and export file,. Any wrong operation causes the file missed; our company shall not be responsible for.

7. Because the software in the flat computer will use a small part of the space of memorizer and computer storage capacity of hexadecimal is different, so the memory capacity display in the operating system will be less than the standard value, which is in conformity with the relevant provisions.
8. If the memory is changed or damaged, the tablet computer can't work regularly, the user can format the tablet computer in his own computer.

Note: our company reserves the right to improve the product. The performance and function of different hardware and software version of a product may have some differences. Thus, you will not be noticed when the changes happen accordingly.

◆**The main function**

1. 7 inch 1024*600 resolution,5 point electric capacity touch screen.
2. This tablet computer is equipped with the most potential Android intelligent operating system , built-in Wi-Fi wireless module, support the local access network or WIFI wireless network, can provide Webpage browsing, including news, e-mail, online games, online video, weather forecast, map, children's interesting software, as much as 1000

kinds of application experience.

◆Firmware upgrade

Before upgrading, shutdown the machine or turn off the power of internal battery, open the upgrade tools directory structure in a computer.

● config.ini

Tool configuration files can be used to set the language tools and upgrade the related attributes. Please check [the common settings in the configuration files](#) for specific setting methods.

● Language

Language file storages directory, all the language files supported are storage in this directory.

● Log

The log directory, log preserves the normal and error output messages during the process of upgrading, the log function can modify the

LOGFLAG in the configuration file to start or shutdown. You're advised to open the log to facilitate future error analysis.

RKDeviceManage.exe

The user instrument program

- Open copy **Demo** function:

Set up: FORMATFLAG=TRUE,

COPYFLAG=TRUE,

DISK_VOLUME= disk volume label

DEFAULT_COPYDIR=The file or directory path need to be copied.

The project Android needs to add a setting:

MISC_MODIFY_MODE=Wipe_DATA; avoid the data in user plate is occupied by "recovery" procedure after copying.

- Erasure steps

Modify configuration files

Insert the waiting upgrading setting, if you're reminded there is a new hardware, please install Rockusb drive procedure.

Start the procedure, select firmware, and to degrade.

- Modify configuration files

Configuration files revision, please check [the common settings in the configuration files](#)

- Install drive procedure

Before upgrading the firmware, please shutdown the player. Keep pressing the upgrade button, and connect the device to the PC port of USB at the same. If it's your⁴⁸ first time to install the device driver,

it will pop up the following tips.

Select "Install from a list or specified location (Senior)", click "Next"..

Select the rockusb.sys in the drive procedure file.

In this way, the USB device driver installation is finished.

- The introduction of promotion interface.

- Operation steps:

Plug the device

Select the firmware

Verify that the device enters into Rockusb state (Rockusb state includes Maskrom state and Loader state)

Description of the error of upgrading or repairing the equipment

“Failed to load configuration information, cannot be operated”, since the Config.ini file loading error, you can get the correct Config.ini file to replace from the publishing procedure

“Failed to load firmware and cannot be operated” is caused by the firmware is not selected or firmware cannot be read correctly, so please make sure the firmware is correct.

“Other operations are running, please wait!” is caused by that other operations are in progress currently, ⁴⁹so please don't proceed until the

other operations end.

If you find “No equipment is found, cannot be operated”, please confirm whether the device is connected, or is in Rockusb state.

If you find “Failed to create operational process, cannot be operated”, please restart the program before proceeding.

If you find “Failed to create operational object, cannot be operated”, please restart the program before proceeding.

If you find “Does not support this type of equipment, cannot be operated”, please confirm whether the device into the Rockusb state. In addition, if the current state is in the U disk, please switch the state before proceeding.

Precautions

To restart the program of user tools after modifying the configuration file.

Under Vista and win7 operating system, please refer to the "administrator privileges to run the program".

X86 represents 32-bit platform, including 2000, XP, Vista, and Windows 7; while amd64 represents 64-bit platform, including Vista and Windows 7 operating system.

Please select the common drive problems based on the actual situation. After connecting the device, if settings are not be found in user instrument. Please, first, to make sure whether the system is denied to the connected device in the device manager of the operating system.

If the system can recognize the device, you can view the device ID under the detailed information in the device properties, and then configure the VID and PID to the MSC VID and MSC PID in the config.ini file under the user tools.

◆ Technical Parameters: 50

Dimension	126.5*195.5*14mm	
Weight	Kg	
Display Screen	7.0 inch TFT LCD screen Resolution: 1024*600	
PC Interface	High-speed USB2.0 (FS)	
Internal Memory	Flash Memory: 4G	
System Memory	ROM: DDR3 512MB	
Extended Capability	Support the TF Card; Support capacity to 32GB	
Power Supply	Built-in 3.7V lithium battery, AC Charger: Input: AC110V~240V; Output: DC 5V@2A	
Musical Function	Play format	MP3,WMA,OGG,APE,FLAC,AAC,WAV
	Support MP3 bit rate	8Kbps — 392Kbps
	WMA 、 WAV bit rate	5Kbps ~ 192Kbps

	Frequenc y response	20Hz to 20KHz
	Distortion	<0.05%
Video Function	Play format: MKV, AVI, MOV, VOB, FLV, 3GP, etc.	
	Maximum resolution: 1280*720	
Image Browser	Supported format: JPG, JPEG, BMP, GIF, etc.

	Transmission speed: Max54Mbps	
	Transmission distance: Max100m	
3G EVDO support list	There is a specific list of support. (Note: 3G USB Dongle is not in the package of the device)	
Recording	Support 3GP format recording	
Operating Temperatur e	-5 ~ 40 °C	

Operating Language	Simplified Chinese, Traditional Chinese, English, Japanese, French, German, Spanish, Hungarian, etc. 40 languages
Operating system	Google Android 4.2

◆ Trouble Shooting

Machine cannot boot up

It will cause the machine cannot boot when the battery power is extreme lack, so please recharge the power by using USB computer or power adapter, and then try to boot under the promise of enough power.

Pressing the reset button on the top of the fuselage to make sure whether it resumes normal startup after reboot.

- Please check whether the charger is connected in good condition.

Tablet PC standby time is too short.

- The lithium battery life will vary with the temperature of the environment and the situation. If the environmental temperature is too high or too low, the battery life will be affected. To use the machine at room temperature. In addition, affected by the volume increase, sound filed special effects, and other factors such as frequent operation, the actual duration may be different from specified one to a certain extent.

Headphones cannot hear voice

- Please check whether the volume is set to 0, or check whether the music file is damaged by playing other music file instead. If the music file is

damaged, it may cause very serious noise or skipping.

Cannot copy file

- Please confirm whether it is right connection between computer and tablet PC, or whether the memory storage space is full.

FCC Warning Statement

FCC Statement This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation .

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

(Note: 3G USB Dongle is not in the package of the device)
