

5 Network Settings

4. If want to forget a connected WIFI, select it and press the Right button on the remote control. Then the interface shows up as below picture. Choose Forget button to forget this WIFI information.

6 Video Settings

6.1 Available Video Interfaces

1. Connecting to TV through HDMI cable

If the TV set has HDMI interface, the unit can be connected to the TV set with HDMI cable. After connecting, turn on the unit. the LED on the front panel is turned on, the screen shows boot logos and then enters the home screen after several seconds.

2. Connecting to TV through TV cable

Connect the AV cable to the AV OUT port, connect the yellow video input plug of the TV set to the yellow CVBS video interface, and connect the white and red plug to the left and right audio interfaces respectively. Turn on the TV, switch to AV input mode, turn on the unit, the LED on the front panel is turned on, the screen shows boot logos and then enters the home screen after several seconds.

Note: Not all models come with the special AV cable. Ask your supplier for details.

6.2 Video Output Settings

6.2.1 Resolution settings

Before operating for the first time, please adjust the screen resolution to achieve the optimal display:
In Settings, -HDMI:

This option is mainly intended for HDMI interface output.

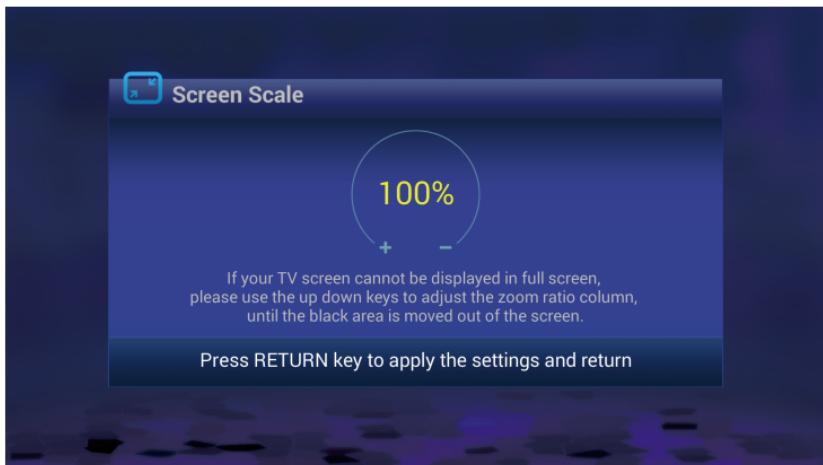

Note: When the selected resolution is not supported by TV-Set, the system will automatically return to the latest good resolution. As an extra safety net, the "RES" button on the remote control can be used at all times to change the resolution without having visual contact with the setting menu.

6.2.2 Screen size settings

If your TV screen cannot be displayed in full screen, please use the UP & DOWN keys to adjust the zoom ration column, until the black area is moved out of the screen. Press RETURN key to Setting interface.

Tips: The smallest scale is 80%.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

The distance between user and products should be no less than 20cm
