RE: CONFIDENTIALITY REQUEST FOR VS-1000

FCC ID: ZVUVS-1000

To Whom It May Concern:

This letter serves as an official request for confidentiality under FCC Rule Sections 0.457 (d) (1) (ii) and 0.459. We have requested that the schematic, block diagrams, parts lists, tune-up procedure, operational/technical description required to be submitted with this application be withheld from public review.

The request for confidentiality is supported by two reasons:

1. This is a RFID contactless card scanning device. Records of scanning devices are advisedly excluded from public inspection, to prevent illegal modification of such devices rendering the device capability to illegally scan information not supposedly intended.
2. The design concept and architecture of the product is proprietary and its confidentiality is crucial for the manufacturer to retain a niche edge in this highly competitive RFID reader industry.

Therefore, for all reasons of security, protection of countless contactless card information, and the retention of the manufacturer's competitive edge, all documents giving aid to modification/copying of transceiver characteristics, viz schematic, block diagrams, parts lists, tune-up procedure, operational/technical description should be safely kept confidential and vaulted away.

Please contact me if there is any information you may need.

Sincerely,

A handwritten signature in black ink, appearing to read 'Adrian Prezioso'.
