1. Purpose and Scope

The purpose of this document is to establish a design specification for the antenna product that Ethertronics is developing for the wireless devices. Any changes or additions to this specification can affect schedule, cost or the product and should be negotiated between Ethertronics and Ubiqconn before being incorporated into the specification. Upon agreement of this specification, Ethertronics will make no changes without the written approval from Ubiqconn. Any changes requested by Ubiqconn will be given to Ethertronics with sufficient time to evaluate the cost impact and reach as required.

Confidentiality Statement

2. Abbreviations and Definitions

AVG	Average
°	Degree
°C	Celsius (degrees Centigrade)
cm	Centimeter
G	Gravitational Force
g	Grams
Hz	Hertz
In	Inches
IQC	Incoming Quality Control
MHz	Megahertz
m	Meter
mm	Millimeter
N	Newton
PCB	Printed Circuit Board
TX	Transmit Band
RH	Relative Humidity
RX	Receive Band
VSWR	Voltage Standing Wave Ratio
W	Watt

Confidentiality Statement

6. Caution For Use

6.1 Storage

- * Please keep the product away from high temperature and high humidity.
- * Please keep product away from corrosive gases such as hydrogen sulfide, sulfurous acid, chlorine, ammonia, etc.... The acid could cause the metal antenna to corrode degrading antenna performance.

6.1.1 Storage Condition 1

Temperature:	5 to 35 °C
Humidity:	45 to 75 %RH
Period:	6 months from date of packaging

6.1.2 Storage Condition 2

Temperature:	- 40 to 90 °C
Humidity:	96 %RH Max
Period:	96 hours

6.2 Handling

- * It is important to handle the antenna carefully and bending or dents made into the metal will cause the antenna to detune and could cause performance issues.
- * Please do not touch product directly with bare hands, this will put fingerprints on the antenna and the acids in the hand will cause the antenna to discolor. While this will not have a performance effect it does have a cosmetic effect on the part.
