

The basis of this C2PC (6 November 2012) is to enable the WLAN operation and therefore allow C2PC for the DTS part of this certification. Therefore, the testing and assessment has been carried out under the DTS part of this certification.

The Grant notes for the existing DSS Grant C2PC (19 January 2012) state that the WLAN operation is disabled. Therefore, this DSS Grant is also modified here but the only difference is a change to the Grant notes; to recognise that the WLAN operation is now enabled and permitted.

No actual change to the Bluetooth / DSS operation.
