

## RPRODUCT DISPOSAL INS TRUCTIONS

The symbol shown here and on the product means that the product is classed as Electrical or Electronic Equipment and should not be disposed with other household or commercial waste at the end of its working life .

The waste of Electrical and Electronic Equipment (WEEE) Directive (2002/96/EC) has been put in place to recycle products using best available recovery and recycling methods to minimise the impact on the environment and to treat anyhazardous substances and avoid the increasing landfill.

Product disposal instructions for residential users:

When you have no further use for it ,please remove any batteries and dispose of them and the product as per your local authority's recycling processes . For more information please contact your local authority or the retailer where the item was purchased.

Product disposal instructions for business users :

Business users should use their own contracted disposal agreements with regards to following WEEE procedures so that this product is not mixed with other commercial waste .

**15.21 statement:**

changes or modifications not expressly approved by the party responsible for compliance could void the user' s authority to operate the equipment.

**15. 105 statement:**

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

.
