

Date: 2016/7/12

TO: Federal Communications Commission,
Authorization & Evaluation Division,
7435 Oakland Mills Road,
Columbia, MD 21046

Request for Modular Approval: ZZOWCM-01

Item	Requirements	EUT	Confirm (Yes/No)
1	Have its own RF shielding	The module has a RF metal shield that fully encloses the RF circuitry and is soldered to the ground plane on all sides. The bottom of the module is a solid ground plane. The holes are significantly smaller than the wavelength of the radiation being blocked. All of this prevents coupling of the RF circuitry with the host board electronics, which the module is plugged into.	Yes
2	Have buffered modulation/data inputs (if such inputs are provided)	The module data inputs are buffered through logic or microcontroller connections. All modulation and data inputs are buffered by circuitry on the transmitter chip.	Yes
3	Have its own power supply regulation	Module has its own Power supply regulation which is compliance with module Full approve.	Yes.
4	Meet the antenna requirements of section 15.203	The module supports an external antenna (specified in the user manual) through a U.FL style unique antenna coupler which is mounted on the module.	Yes.
5	Demonstrate compliance in a stand-alone configuration	The module is in a stand-alone configuration during the test for compliance with part15 requirement.	Yes.
6	The licensed module must have a FCC ID label on the module itself. That FCC ID label must be visible through a window on the final device or it must be visible when an access panel, door or cover is easily removed. If not, a second label must be placed on the outside of the final device.	The module is labelled with its permanently affixed FCC ID label. The label position is clearly indicated.	Yes.
7	The module must comply with all specific rules applicable to the transmitter. The grantee must provide comprehensive instructions to explain compliance requirements.	This module is full compliant with FCC rules. Pls refer the detail in the user guide	Yes.
8	The module must comply with RF exposure requirements. See FCC Rules. Spread Spectrum transmitters must comply with RF exposure limits in 15.247.	The module complies with FCC CFR 47 part2.1091 and FCC KDB 447498 D01 General RF Exposure Guidance v05r02 limit, please refer RF exposure	Yes.

	letter.
